

OUR AMAZING TRIP TO SLOVENIA!

Due to this great opportunity I had the chance to meet many, new, amazing people from different countries all around Europe and established life-long friendships.

Additionally, I really enjoyed visiting the beautiful capital city,

Ljubljana as well as the mountains in Logarska Dolina. The views there were unforgettable. Furthermore, not only did the trip include fun trips and activities, but it also had educational purposes. We took part in very helpful workshops about soil, conducted our own experiments and discovered what soil is made of and how to make good use of it. In conclusion, I'd definitely love to come back and re-live the experience if I could.
