

Erasmus+

In October I went to Slovenia, with the Erasmus+ project. I spent a week at Gaja Turnsek's. It was great time. I met wonderful people and I saw a lot of interesting places. On the first day we had a meeting with students from other partner countries and learnt about their schools. Then my host family took me to the castle in Celje. On Tuesday we visited the Agroculural institute of Slovenia where we had a lecture. Later we went to Ljubljana and we were visiting the city. The whole Wednesday we had workshops about soli. Each of us was in a different group and we carried out different

experiments. We spent the afternoon on an eco-farmer. The very best day was Thursday because we went to Logarska Valley: a beautiful place with wonderful views. On the way back to Šentjur we saw the soil test pit. On the last day before we left we had quiz about Slovenia and received our certificates. My friend and I together with our host families went to the most popular lake in Slovenia, Bled. I tried regional cake kremšnita. My host family was really nice. They took care of me and I had a lot of fun with them. It surprised me that so many people segregate rubbish. Slovenia is a very clean country.
